DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6 and 12-17, drawn to a communication apparatus wherein a value of $\alpha + \beta$ is controlled by the control means under a relationship of:
 $\alpha - \beta + \gamma = 2n\pi$. (n is an integer). See figure 6.

II. Claims 1-5, 7-8, 12-16, and 18-19, drawn to a communication apparatus wherein a value of $(\alpha + \delta) + (\gamma + \psi)$ is controlled by said control means under a relationship of: $(\alpha + \delta) - (\beta + \phi) + (\gamma + \psi) = 2n\pi$. (n is an integer). See Figure 10 and Figure 11.

III. Claims 1-5, 9, 12-16, and 20, drawn to a communication apparatus wherein a value of $(\alpha + \delta) + (\gamma + \psi)$ is controlled by said control means under a relationship of: $(\alpha + \delta) - (\beta + \phi) + (\gamma + \psi) = 2n\pi$. (n is an integer). See Figure 12.

IV. Claims 1-5, 10, 12-16, and 21, drawn to a communication apparatus wherein a value of $(\alpha + \delta) + (\gamma + \psi)$ is controlled by said control means under a relationship of: $(\alpha + \delta) - (\beta + \phi) + (\gamma + \psi) = 2n\pi$. (n is an integer). See Figure 15.

V. Claims 1-5, 11, 12-16, and 22, drawn to a communication apparatus wherein a value of $(\alpha + \delta) + (\gamma + \psi)$ is controlled by said control means

Art Unit: 2618

under a relationship of: $(\alpha + \delta) - (\beta + \phi) + (\gamma + \psi) = 2n\pi$. (n is an integer). See Figure 16.

2. The inventions are distinct, each from the other because:

Inventions Group I, Group II, Group III, Group IV, and Group V are species claims. And, the Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is the generic claims. See MPEP § 806.05(d).

3. Because these inventions are independent and distinct for the reason(s) given above and have acquired a separate status in the art as shown above by their recognized divergent subject matter and a different field of search is required for each group (see MPEP § 808.02), restriction for examination purposes as indicated is proper

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention or a species to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or a species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2618

6. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
